

FARMEAL

Full-stack Agri Ecosystem for Fresh Produce

Connecting 1,000+ farmers to institutional buyers —
eliminating wastage, guesswork & middlemen.

B2B · AgriTech · AI-Powered

Delhi-NCR → Pan India

Founded 2023 · www.farmeal.co.in

THE PROBLEM

India's Agri Supply Chain Runs on Guesswork

40%

30- 40% of fresh produce lost before reaching consumers

India = world's 2nd largest producer of fruits & vegetables

FARMER SIDE

- **Mismatched Supply and Demand:**
Overproduction or shortages due to poor market insight
- **Multiple Middlemen Layers**
Added costs, delays, and wastage
- **Price Fluctuations & Income Collapses:**
Volatility risks, price crashes in mandi due to surplus supply.
- **Unsold produce:**
Significant wastage daily at mandis like Azadpur due to no timely buyers.

INSTITUTIONAL BUYER SIDE

- **Lack of Inventory Visibility**
No real-time updates cause sourcing delays
- **Unclear Pricing:**
Last-minute negotiations, budget overruns. High Manual Labor Requirement & Transportation Hassles
- **Replacing Processed Foods with Fresh:**
Institutions want to switch back to fresh produce
- **No Digital Records**
Increased errors and paperwork burden

*Insight: India's agriculture remains **95% unorganized**, employing **41.9% of the workforce** — yet operating without structured demand signals.
The result: systemic inefficiencies, price volatility, and millions lost in wastage every year.*

THE SOLUTION

Farmeal: Full-Stack AI Agri Supply Platform

PRE-HARVEST

AI Price Predictor

Ingests mandi prices, weather, crop & demand data

ML model forecasts prices & demand cycles

Farmer dashboard: best crop, best time to sell

Target 95% accuracy via Agristack API integration

POST-HARVEST

B2B Digital Marketplace

Connects verified farmers to institutional buyers

WhatsApp-first — ultra-low tech barrier to entry

Real-time inventory, transparent pricing dashboard

Clustered delivery: lower logistics cost & waste

AI CORE

OUTCOME: Stable farmer income · Predictable institutional supply · Zero middlemen · Minimized food waste

Architecture

CAPSICUM PRICE-FORECASTING

Objective: Predict capsicum prices at Azadpur Mandi with uncertainty bounds on monthly basis.

Data Sources

Nov 2017 - June 2025

Agmarket & APMC : Arrival and prices

Visual Crossing Weather Query Builder: weather conditions

Model Mechanics

Gradient Boosting (GBM)

Ensemble of many shallow decision trees.

for error $u=y-q$ and quantile level α :

$$\rho(y, \hat{y}) = \begin{cases} \alpha \cdot (y - \hat{y}) & , \hat{y} \leq y \\ (1 - \alpha) \cdot (\hat{y} - y) & , \hat{y} > y \end{cases}$$

Train three GBMs with the same features:

1. Lower GBM with $\alpha=0.10 \rightarrow$ conservative low price
2. Median GBM with MSE loss $\rightarrow$ best-guess price
3. Upper GBM with $\alpha=0.90 \rightarrow$ conservative high price

Model Performance

The model has **88% accuracy**

[Check out the model here](#)

The mobile app interface shows a sidebar with input fields for various weather and climate parameters:

- Month: Jan
- Arrivals (tonnes): 1000.00
- Max Temp (°F): 96.00
- Min Temp (°F): 81.00
- Humidity (%): 60.00
- Precipitation (mm): 2.00
- Solar Energy (MJ/m²): 15.00
- UV Index: 7.00

The mobile app interface displays the **Capsicum Price Forecast** results:

- Forecasted Price (Rs./Quintal)**
- Lower bound (5th %ile): ₹2,240.48
- Median estimate: ₹3,474.72
- Upper bound (95th %ile): ₹3,084.16

WHY FARMEAL WINS

Full-Stack Platform — No Competitor
Connects Both Ends

FARMEAL

AI · B2B · Delhi-NCR

★ Only full-stack

DeHaat

\$270M raised · agritech

Vegrow

\$86.5M raised · fruits only

Bijak

\$36M raised · commodities

Farmeal is the ONLY Full-Stack Platform — Connecting Both Pre and Post Harvest Ends

Real Pilots. Proven Model. Growing Institutional Pipeline.

10+

Institutional Partners

2,000 kg/week demand confirmed

Jun '25

EWS Cluster — North Delhi

Fresh mango supplied at subsidised rates

Jun '25

Yoga Day Drive

200 children, 4-fruit combo at ₹23

Jul '25

Rotary Club Event

500 participants, surplus fruit combo

MARKET OPPORTUNITY

Total Addressable Market

All institutional and community food services in India

₹200,000 Cr

Serviceable Addressable Market

Institutional and community food services in Delhi-NCR

₹30,000 Cr

Serviceable Obtainable Market-0.1%

Targeted institutions in Delhi-NCR during initial rollout

₹3,000 Cr

Market growing at 10% CAGR · ₹2,00,000 Cr (2023) → ₹3,20,000 Cr (2026) · Farmeal targets just 0.1% of SOM in Phase 1

BUSINESS MODEL

Multiple Revenue Streams · ₹200–300 Cr Potential in 3 Years

NEAR-TERM GTM: GOVT SCHOOL MALNUTRITION VERTICAL

40 schools × 1,000 students × ₹1 margin = ₹11.52 Cr/yr · 14 NGOs aligned · 40 schools committed · Target: 750+ Delhi govt schools

ROADMAP to Rs. 50 lakhs ARR in 12 months

Phase 1

0–6 Months

Hire: 2 Tech, 2 Marketing, 2 Ops, 1 Economist

Build: AI Price Predictor (95% + Accuracy) + Farmer & Buyer Dashboards

Onboard 40+ institutional buyers (schools, hostels)

Phase 2

6–18 Months

Agristack API integration → 95% prediction accuracy

Launch agri-input marketplace (seeds, fertilisers)

Scale to 750+ Delhi govt schools

ASK
